

To Whom it May Concern,

I am troubled by my understanding that K-LOVE may be taken off the air. K-LOVE provides positive messages in our community and every day I speak to someone who had just discovered them and are sharing their good works with the community. I feel, in our world of troubled times, K-LOVE is an inspiration and a highlight to people to help them focus on positive things and get involved in helping their local community and those in need. There is very little these days that you can tune into that provides positive messages, clean and encouraging music to our families and creates a positive role model for our young generations to follow. Please reconsider any ideas of removing them from the air and continue to help the local and national communities come together and support one another through their message. Thank you for your time and consideration.
